

Where We Are: adding events by message

In the app: tap the green **+** **Add** button (bottom right, every page). Type, or tap the microphone and say it. A preview shows what will be added; press **Add**, and **Undo** if needed.

In Slack: post in **#where-we-are** (or DM the Where We Are app). The bot replies in a thread with **Edit** and **Undo** buttons. Both use exactly the same rules.

1. Adding an event

Write **what · who · day · time · where**, in any order.

You type	You get
Percy swimming Thu 4-5	Swimming · Percy · Thu 16:00–17:00 · David
Beavers meeting Mon 7pm at scout hut	Beavers meeting at scout hut · Mon 19:00–20:00
Dentist Bernie 14 Oct half 3	Dentist · Bernie · 14 Oct 15:30–16:30
Ashley drop Percy tomorrow 8:45	Drop-off · Percy · 08:45 · Ashley
Legoland all day tomorrow for the family	All day · Bernie & Percy · David & Ashley
Beavers camp Sat 6pm to Sun 9am	Sat 18:00 → Sun 09:00 (one entry per day)
Cornwall 20-24 Oct for the family	All day, 20–24 Oct · Bernie & Percy · David & Ashley
Bernie football every Saturday 10am	Weekly for 8 weeks
Percy swimming Tuesdays 4-5 until 15 Dec	Every Tuesday up to 15 Dec

2. Who it's for

If you say	It means
Nobody named	It's yours (whoever posted it)
Ashley or Joy	They're doing it
both of us / us / we / me and Ashley	David & Ashley, no kids
the family / all of us / everyone	David, Ashley, Bernie & Percy
A kid's name	Tags Bernie and/or Percy

3. Days, times and repeats

Days	today, tomorrow, Mon, next Tues, Friday week, the Saturday after next, in 2 weeks, a week tomorrow, 14 Oct, 4/10
Times	3pm, 4-5, 8:45, half 4, quarter past 3, quarter to 5, noon, all day
am / pm	A plain 7–11 is morning , a plain 12–6 is afternoon . For the evening write 7pm or say tonight .
Length	No end time means it lasts 1 hour . Over several days: from 6pm on 10 Oct to 9am on 11 Oct, Fri 6 until Sat 10, 20-24 Oct .
Repeats	every Tuesday, Tuesdays, every other Friday, for 6 weeks, until 15 Dec. Without an end, it runs for 8 weeks.

4. Changing an event: reply in its thread

Reply	Does
5pm · 4-6 · half 5	New time
move to Fri	New day (a repeating series moves together)
Ashley's doing it · me · both of us	Changes who it's for
rename to Scout meeting	New name
cancel	Deletes it (or press Undo)

Or tap **Edit** to change it in a form. Only the person who added an event can change it.

Prefer a form? In Slack type **/event**. **Tips:** always include a day. Speaking works with words too ("four till five", "half three", "seven p.m."). To delete, use **Undo** or reply "cancel", or delete it in the app, not in Google Calendar.

The rules, for review

Every rule the app and Slack bot apply, in order. Tell us which to change.

Reading the message

- Slack formatting (*bold*, _italic_) is ignored.
- Spoken numbers become digits when they're clearly times: "four till five" → 4-5, "seven p.m." → 7pm, "four thirty" → 4:30, "ten o'clock" → 10. "In two weeks" / "for six weeks" are left alone.
- "half 4" = 4:30 (British), "quarter past 3" = 3:15, "quarter to 5" = 4:45, noon / midday = 12:00.

Times

- A bare hour with no am/pm: **7–11 = morning**, **12 and 1–6 = afternoon**. 13–23 are read as 24-hour.
- "tonight", "this evening", "this afternoon", "in the evening" make bare hours pm; "this morning", "in the morning" make them am. The "this..." and "tonight" forms also mean today.
- A range ("2-4pm", "9 to 11", "2 till 4") uses the end's am/pm for the start too. If the end would be before the start, it's moved 12 hours later.
- Only a start time → the event lasts **1 hour**. No time, or "all day" → all-day event.
- A number straight after a month ("Oct 3") or with st/nd/rd/th, or in 4/10, is a date, not a time.

Days

- A day is required; without one the app asks "Which day is that?".
- today, tomorrow; a bare weekday = the next one, **including today** ("Thu" on a Thursday = today).
- "next Tues" = the Tuesday in **next** week (Mon–Sun), never this week. "Friday week" = next Friday + 7 days. "the Saturday after next" = skip the coming Saturday.
- "in 3 days", "in two weeks", "a week today", "a week tomorrow".
- Dates: "14 Oct", "Oct 14", "14th October", "4/10" (day/month). Dates always look forward.
- Several weekdays ("Thu and Fri") create one event on each.

Repeats

- "every", "each", "weekly", or a plural day name ("Tuesdays") = weekly. "every other", "fortnightly" = every 2 weeks.
- Runs for **8 weeks** unless "for N weeks" or "until <date>" ("until Christmas" = 25 Dec) is given. Maximum 40 entries.

Multi-day

- A start and finish on different days ("from 6pm on 10 Oct to 9am on 11 Oct", "Sat 6pm to Sun 9am", "Fri 6 until Sat 10", "20-24 Oct") becomes **one entry per day**: first day from the start time to 23:59, middle days all day, last day 00:00 to the finish. Each entry notes the full span. Maximum 31 days.
- "Sat 10 until 13 Dec" is read as weekly on Saturdays at 10 until 13 Dec, not as 10–13 Dec.

Who

- Kids named in the message are tagged (Bernie, Percy). "the family", "all of us", "everyone" tag both kids.
- Assignee: nobody named → **whoever sent it**. A helper (Joy) or one adult (Ashley) named → them.
- "me and Ashley", "both of us", "us", "we", or the family words → **shared** (All Family): no single assignee, shown as David & Ashley.
- Names are matched against the app's People, Helpers and Kids lists, so spell them as they appear there.

Title

- The title is what's left after removing days, times, names and "me/I".
- Linking words left dangling are dropped ("meeting for me at 7pm on Monday at scout hut" → "Meeting at scout hut"). Filler at the start/end (the, a, to, for, with, taking...) is trimmed.
- drop / drop off / drop-off → **Drop-off**; pick up / pickup / collect → **Pickup**; any other words go to notes. Nothing left → "Event".

Changing (Slack thread replies)

- "cancel", "delete", "remove", "scrap", "called off" → delete. A new time → change time (keeps the length if only a start is given). A new day → move (a series shifts by the same number of days).
- A name / "me" / "both of us" → reassign. "rename to ...", "change to ...", "call it ..." → new title.
- "thanks", "ok" and thumbs-up are ignored. Only the person who added an event can change or undo it.
